

Working in care homes during Covid-19: MAKE YOUR VOICE HEARD!

To help care homes and government understand how to support care, researchers are studying the effects of Covid-19 on the resources available to care.

The study combines analysis of care home finances with the experiences and ideas of frontline staff: please share yours!

This project is led by independent researchers at University College London and Warwick University, with public funding, and partners in the sector – National Care Forum and UNISON.
